EDUCATION

The University of New South Wales (UNSW)

Feb. 2019 – Dec. 2021

Bachelor of **Computer Science** – 3rd (Final) Year

Sydney, NSW

- **Awards:** UNSW Engineering Dean's List 2020
- **WAM:** 80/100 (Distinction).
- **Relevant coursework:** 95 HD - Data Structures and Algorithms
- **Societies:** UNSW Computer Science and Engineering Society (UNSW CSESoc), Arc Sport - Oztag.

WORK EXPERIENCE

ServiceRocket

Jun. 2021 – Present

Software Engineer

Sydney, NSW

- Implemented an expansion tree-selector using TypeScript to improve usability and accessibility for users when selecting expansions

Digital Presence

Nov. 2020 – Jun. 2021

Software Engineer

Sydney, NSW

- Generated daily potential leads report for Sales team using Python by designing and implementing multiple web-scrapers which acquire a **daily average of 120 lead contact details**.

Epiroc

Feb. 2019 – Feb. 2021

IT Support Specialist

Sydney, NSW

- Innovated the automation of a ticket follow-up system by developing Python scripts which routinely send email reminders to users worldwide, improving IT support ticket completion time by **80%** and hardware asset return rate by **65%**.

EXTRA-CURRICULARS

Hackiethon 2021 - Hackathon

2 – 5 Apr. 2021

- **BreakFromHome.com:** Constructed a full-stack web application using the **MERN** tech stack (MongoDB, Express, React, Node.js) which improves the mental/physical health and productivity of users working from home through a pomodoro-reminder, account-based system.

PROJECTS

- **Recipe Scraper:** Produced a web-app which web-scrapes and converts online recipes into a simplified, cleaner format **within 1-2 seconds** using Python, Flask, Shell Bash, and HTML/CSS.
- **Personal Website: (5ives.github.io):** Designed and developed a portfolio site using Github Pages, JavaScript, React, and HTML/CSS to showcase my achievements, projects, and resume.
- **Spotify Stats:** Constructed a web-app which allows a user to preview their Spotify account statistics (e.g., top 20 songs/artists listened to) using Python, Flask, HTML/CSS, JavaScript, and Spotify's web API.

SKILLS/LANGUAGES

Java, JavaScript/TypeScript/React, HTML/CSS, Python, C, Linux/Unix/Shell, MySQL/PostgreSQL/MongoDB
